

## PROCEDURES AND GUIDELINES SEATING NOTES

### **Accommodation Service Row**

Row S, located near the auditorium doors in orchestra left allows for ADA accommodation. Seat number S2 is an actual theatre seat, leaving S4, S6, & S8 as open spaces for wheelchairs or armless chairs. Orchestra level may be accessed by an elevator from the lower lobby. All restrooms in the main lobby and on the orchestra level are ADA compliant.

### **Orchestra level**

The orchestra level is divided into three areas. Center section seats are designated by single letter and three-digit seat number (for example, A-101). The middle section has one support pole for the balcony in between row M and N. Due to the location of this pole, the Morton Theatre Box Office does not sell seat O-107. This seat has a completely obstructed view.

*This section holds approximately 180 patrons.*

The sides of the orchestra level offer similar views of the stage as the center section. The right side (or House Right) orchestra seats have a single letter and an odd-numbered, single-digit seat code (for example, G-5). The left side (or House Left) orchestra seats have a single letter and an even, single-digit seat code (for example, J-8). There are support poles on the orchestra level which obstruct some views. Therefore, the Morton Theatre Box Office does not to sell H-1, H-2, M-7, M-8 or R-4.

*Orchestra left seats 48 patrons and orchestra right seats 44(not including accommodation row S.)*

### **Balcony Level**

Seats in the balcony have less leg room than those in orchestra level, but the view is unobstructed as the seating is tiered. **The balcony level is not accessible by elevator.** Balcony seats have a double-lettered rows (AA). Seat digit codes in the balcony follow the same pattern as the orchestra level: three digits = center section; single or double-digit, even = left side; and single or double-digit, odd = right side. The main, multiple-stall restrooms for men and women are located on the balcony level landing.

*The center balcony seats 61 patrons. Each side section seats 45 patrons.*

### **Upper Balcony**

The upper balcony has stadium-style bench seating or "bleachers" as this section is commonly known. This seating does not offer back support for seated patrons, but still offers a comparable, unobstructed view of the action onstage.

*This section holds approximately 53 adult patrons.*

### **Box Seating**

The Morton Theatre has preserved its pagoda-style box seats from the original design in 1910. However, these seats are not open to the public. The upper box seats' low railings and an uneven floor are not coded for patron seating. The lower box seats are reserved for overflow ADA seating, and not recommended for regular use due to the proximity to the house sound system.

**Morton Theatre Seating Capacity = 480**
